

Queueing Workshop

August 30

14:00 – 14:15 Opening

14:15 – 16:00 Session 1

Onno Boxma

On two classes of reflected stochastic processes

Tuan Phung-Duc

Queueing analysis of autoscaling systems

Mohan Chaudhry

Analytically explicit results for the distribution of the number of customers served during a busy period for the M/G/1 queue

Demetres Kouvatsos

Non-extensive maximum entropy formalisms and stable M/G/1 queues with heavy tails

16:00 – 16:10 Break

16:10 – 17:20 Session 2

Harry Perros

An unofficial and slightly biased history of queueing theory: 1972-2015

Guy Latouche

How much detail do you need?

Chris Blondia

Herwig: engineer or mathematician?

17:20 – 17:30 Closing

17:30 – 19:00 Reception
